At the end of September, the group's consolidated turnover was up 3.9 % compared to 30 September 2006 which recorded growth of 2.3 % (5.9 % for the full year).

Turnover in the 3rd quarter was €15.26 million, up 5% compared to the same quarter last year.

Taking into consideration the historic weakness of the 3rd quarter, the conditions under which the Group was operating and the key indicators for the period are not representative of 2007.

The 9 month operating profit is in line with expectations and the integration of the latest acquisition is in the process of being finalised.

Acquisition of SABCO

During the 3rd quarter of 2007, Pharmagest announced the acquisition of the Belgian company SABCO. The Pharmagest Inter@ctive group has thus gained access to 653 pharmacies in Belgium and Luxembourg and now has a 12% market share in these 2 countries. SABCO has already installed more than 2,200 computer terminals and equips 623 Belgian pharmacies and 30 Luxembourg dispensing chemists (out of the 80 in the country).

The impact of the Belgian subsidiary SABCO's integration into the group was still negligible on 30/09/07.
